

Become a Qualified Orofacial Myologist

Course

Recognized worldwide as the premier course for speech, dental and medical professionals, this class allows participants to enter the process for Qualification in Orofacial Myology (QOM). Professionals fly 1000s of miles from all 6 continents to attend. It offers in-depth training for evaluation, diagnosis and treatment for Orofacial Myological Disorders while engaging in problem solving and interesting challenges that are interwoven into the hands on experience. Weak lips, speech disorders, mouth breathing, oral habits, airway issues, tongue tie (ankyloglossia), feeding issues, oral prep stage of the swallow, "tongue thrust," drooling, and other conditions are incorporated into this training. The "Myo Manual" is included, giving each participant a sequential, systematic, and sensible program of treatment that can be implemented immediately.

Orofacial Myology: From Basics to Habituation

28 hour Training Course

Sandra R. Holtzman
MS, CCC/SLP COM, QOM

Becky Ellsworth
RDH, BS, COM, QOM

Sandra R. Holtzman
MS, CCC/SLP COM, QOM

Author of the Myo Manual Treatment Program and several oral habit programs, Sandra has specialized in Orofacial Myology for most of her career. While directing a large multi-disciplinary therapy center, she further developed her program of treatment and began offering training courses to local dentists, orthodontists and speech pathologists. This was followed by traveling throughout the United States and Canada, providing training for professionals from all parts of the world wishing to become "Neo-Health Grads." Sandra has held positions at three universities and has developed several online courses in addition to her widely attended live classes and seminars. Currently she heads the QOM committee for Qualification in Orofacial Myology.

Becky Ellsworth,
RDH, BS, COM, QOM

Having been an instructor for orofacial myology since the 90's, Becky joined the Neo-Health Services team in 2013. She has been an RDH for over 30 years and has worked in both TX and MI in private dental practices. Becky is an instructor at Kalamazoo Valley Community College, providing an orofacial myology course built into the dental hygiene curriculum. She also provides orofacial myology services at Kalamazoo Speech Associates. Becky serves on the QOM committee for Qualification in Orofacial Myology.

Robert Mason
DMD, PhD, ASHA Fellow

Co-author of the leading text, Orofacial Myology: International Perspectives, Dr. Mason is the only known PhD speech-language pathologist/orthodontist combination in North America. He chaired two ASHA committees that wrote position statements and guidelines related to orofacial myological disorders. He received his PhD in Speech Pathology from the U. of Illinois, served on speech pathology faculties for 10 years in three different universities, and then completed his dental studies. Dr. Mason obtained his orthodontic training at the U. of North Carolina and served as Professor and Chief of Orthodontics in the Division of Plastic and Reconstructive Surgery at Duke University Medical Center for 20 years. He has published extensively in speech pathology, orofacial myology, medical and dental journals and texts, with special emphasis on orofacial myology and cleft/craniofacial conditions. Dr. Mason is a Past-President of the American Cleft Palate-Craniofacial Association.

- 12:30 - 1:30 Lunch
- 1:30 - 3:15 Myo Manual multiple uses; Online sources Referral sources, Sample office/other forms
- 3:15 - 3:30 Break
- 3:30 - 5:00 Brochures reviewed, dispensed Review, discuss and collect post tests Receive Certificates; Conclusion

Course Objectives

Upon completion of this course, the participant will be able to do the following:

- Utilize Orofacial Myology: From Basics to Habituation (the Myo Manual) Program for oral myofunctional therapy, “tongue thrust” and other symptoms and disorders.
- Provide clients a method to eliminate sucking habits, nail biting, and other negative oral habits.
- Explain the connections upon one another of sucking habits, lisping, imprecise articulation, malocclusion, tongue-tie, poor eating skills, mouth breathing, self-esteem, and other findings.
- Explain the importance of the Oral Preparatory Phase of Swallow and be able to break it down into its various components.
- Evaluate and diagnose tongue-tie (ankyloglossia) and provide post frenectomy treatment.
- Administer an oral exam suitable for orthodontic and speech referrals.
- Describe which types of exercises to use for open lips posture, mouth breathing, digit-sucking habits, poor bolus control, drooling, post frenectomy, and other oral myofunctional symptoms.

Testimonials

*I really need to let you know how much your course has impacted my therapy. I have used more of what I learned in your course than any course I have ever taken. It really has brought my therapy to a new level Thanks,
Kim*

I can't tell you enough how much your course was such a game changer! Thank you so much for all the time you and the rest of the team put into our education. It was the most thorough and clinically relevant instruction I've ever received.

*I see so many benefits from your approaches. No one else has anything like it. It is the most useful info I have ever gotten and you are the best therapist I have ever known. I hope you will do more courses, artic courses and guides, etc.
Brenda R.*

*I cannot say enough about the dynamic duo, Sandra and Becky. They both did an amazing job explaining concepts and answering questions. Because they keep the class size small, I felt like they were able to give me personal tips and ways to succeed.
Chris*

*Hi Sandra,
Your course was outstanding and a true learning experience. It was by far the best workshop I EVER attended. You and Becky are a wonderful team and it is apparent that you both are Gurus of OMT.
Janet*

*I want to applaud you for your wonderful work in getting fact based and evidence based information out there regarding our field and scope of practice- It's so nice to see and I envy your energy!
Pat*

*From course evaluation forms:
You did an amazing job explaining concepts and providing feedback on all exercise tasks immediately and with patience and concern that it is completed correctly. The videos of specific cases helped solidify concepts.*

It is hard not to bubble over with enthusiasm when you just feel more enlightened by the minute!

The Myo Manual program is so incredibly comprehensive, and the sequence is perfect, so I've never felt the need for any other program. I took someone else's course 2 years ago. It was very confusing and cookbook style.... Sandra's is much more comprehensive! I strongly recommend evaluating your patients with her method!

I took a course from another trainer not long ago, but I only learned to evaluate and was told to then treat clients with a variety of exercises. In your course you gave me a “system” to know what to do and when to do it. I am so grateful I found you and your wonderful program.

Everything exceeded my expectations. I liked the expertise, experience, social skills.....Sandra and Becky are REAL!!!!
